Presents

PowerPoint Tricks for Genealogists

By Mike Garrambone

We genealogists are always gathering, analyzing, and preserving information, which means both documenting, and presenting our findings.

We get great marks when our information is well arranged and we enjoy super applause when it looks great and your viewers want to know how you created the colorful imagery that accompany the detailed research work.

This presentation is for the PowerPoint novice and shows you how to use several easily available PowerPoint tools and simple graphic techniques to document your research and to make it look highly professional, interesting and attractive, and basically "way cool."

Michael W. Garrambone is a retired Army Officer and Military Operations Research Analyst for InfoSciTex Corporation in Dayton, Ohio. He graduated from the University of Florida with an Engineering Science and Mechanics degree and earned master's degrees in operations research, business administration, and education. Mike is a staff member at the Dayton East Family History Center in Fairborn, Ohio where his interests are in Italian genealogy, historical research, computer applications, computer graphics, and teaching. He has been doing family history research since 1980 and has been tracking Italian immigrants, African Americans, and Native Americans from the Virginias and South Central States.

Next Zoom Meeting

Saturday, July 10, 2021
1:30 p.m.

Members will receive an email with a link to the virtual meeting 1 or 2 days prior to the meeting.
